

BELLIS

Multi-User Pump

Introducing the Multi-User POWER Pump™

We have taken the confusion out of power pumping and have created the world's first multi-user breast pump with an automatic Power Pumping button! Increase milk supply without the hassle of manually following a power pumping schedule.

COMPACT & PORTABLE

Unlike bulkier alternatives, Bellis requires no cumbersome stand for portability. Its minimalist footprint ensures effortless maneuverability and seamless integration into the NICU room and hospital storage rooms.

Weights less than 1.5 pounds!

the Personal NICU Pump™

WORLD'S FIRST personal NICU pump.*

- Alyssa allows mothers of premie babies to take their personal NICU pump home.
- Quickly establishes milk supply and is the most comfortable pump on the market.

ULTRA-HYGIENIC

Touchscreen control panel allows for sanitation with medical-grade disinfectants. No raised buttons prone to harboring bacteria.

Closed system design ensures that not a single droplet of milk ever reaches the tubing, safeguarding against contamination.

built-in battery
allows pumping for
2 days **

power pumping mimics
cluster feeding, which
increases milk supply **

strong suction,
250 mmHg @ double
pumping

integrated
double bottle
holder

save the entire pumping
session with the
replay button Memory Plus

control
Alyssa via smartphone
using the MyArdo app

let-down button for
2-phase function,
similar to the sucking
behavior of baby

suction & cycle
independently
adjustable,
64 settings

timer to keep
track of your
pump session

smooth surface
is easy to clean

weighs less
than 1.5lb!

* total of eight 15-min pump sessions
